PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience building production-ready web applications from system design to cloud deployment. Built software products, including a multi-vendor e-commerce platform and an AI-powered multi-agent application. Committed to building reliable software through collaborative development.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, Expo
Backend: Node.js, Express, FastAPI, JWT/OAuth, RabbitMQ
Database: MongoDB, PostgreSQL, Mongoose, Prisma, Redis
Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux
AI & ML: LangChain, LangGraph, PyTorch, Scikit-learn, NLTK

EDUCATION

Rajshahi University of Engineering & Technology (RUET) July 2026
B.Sc. in Electrical and Computer Engineering CGPA: 3.64 / 4.00

EXPERIENCE

Founding Engineer 2024 - 2025
Halfcast - Food Token Management System, a startup by Team PaatiHash (UIHP RUET) [GitHub](#)

- Architected and built a mobile app (React Native, Expo) to digitize food token management for university halls, translating UI/UX wireframes into responsive interfaces used daily by hundreds of student users
- Implemented frontend state management, integrated REST APIs, and collaborated in an Agile SDLC using Git

Web Developer / Webmaster 2023 - 2025
IEEE RUET Student Branch & Astronomy and Science Society, RUET [IEEE Demo](#) | [ASSR Demo](#)

- Designed, developed, and maintained responsive websites for two university organizations using modern web tools, publishing workshops, seminars, and event information for thousands of students.

Software Training, BJIT 2 Weeks

- Completed industry training in software engineering practices, Git workflows, and Agile development

FEATURED PROJECTS

ZapMart - E-Commerce Platform zapmart-lyart.vercel.app | [GitHub](#)
Tech Stack: Next.js, React, TypeScript, MongoDB, Better-Auth

- A multi-stakeholder e-commerce platform (customer, vendor, admin) with RESTful Next.js API routes, role-based access via Better-Auth and Google OAuth, and deployment on Vercel

Synapse - Multi-Agent AI Chat Application synapse-zeta-five.vercel.app | [GitHub](#)
Tech Stack: React, Express, MongoDB, LangGraph, Qdrant, Groq, Gemini, Zustand

- A fullstack multi-agent chat app with a LangGraph supervisor coordinating five specialized agents, RESTful Express APIs with JWT/cookie authentication, RAG via Qdrant, and Docker-based deployment on Render/Vercel

Movie Recommender movie-recommender-iota-one.vercel.app | [GitHub](#)
Tech Stack: Python, FastAPI, Scikit-learn, Pandas, NLTK, Next.js, TypeScript

- A content-based movie recommendation engine (TF-IDF, cosine similarity) served via a RESTful FastAPI backend with a TMDB discovery API-based fallback for unmatched titles, deployed on Render/Vercel

HONORS & AWARDS

18th/60, RobSub 2026 - USA – Software Team (autonomous control & simulation) 2026
1st Place, Poster Presentation - RUET 2025
Champion, Codespark Programming Contest - RUET 2022

LEADERSHIP

Vice Chair, IEEE RUET Student Branch 2025-2026
Vice President, Robotic Society of RUET 2025-2026
